(*)	"Variety of fees" encompasses charges that intermediary banks may impose according to their policies. These fees, if applicable, may have been deducted from the transaction amount. DNBC does not have control over these intermediary bank fees. An intermediary bank is a bank that acts on behalf of the sending bank to facilitate international money transfers via the SWIFT network. This type of bank is needed when the sending and beneficiary banks don't have an established relationship. They'll often charge their own fee for their services, which will impact the amount your recipient gets.
